

→ Stand for X-ray unit with integrated holder for cassette and grid

Brief description

- The unit support pole moves along the table, simultaneously with the built in grid ready cassette holder. The X-ray unit is always perfectly aligned with the X-ray cassette. Only minimum repositioning of the patient is required.
- Table frame: anodised aluminium
- Table top: radiolucent white synthetic
- Easy to clean and disinfectant proof
- Optional: Adjustable positioning aide for dysplasia coxae
- Dimensions:
 - Table top: 155.5 x 67.5 cm
 - Working height: 73 cm
 - Total height: 182 cm

X-ray table „CombiVet S“

X-ray table „CombiVet S“

X-ray unit suspension module available in two variations (Type I and III D)

The X-ray generator can be operated with the hand control

* X-ray generator, hand control and foot pedal are not included.

Alternatively to the hand control, a foot pedal can be used to trigger the exposure

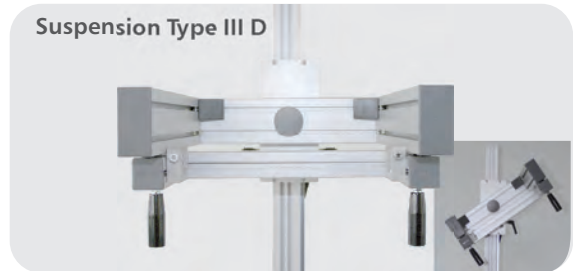

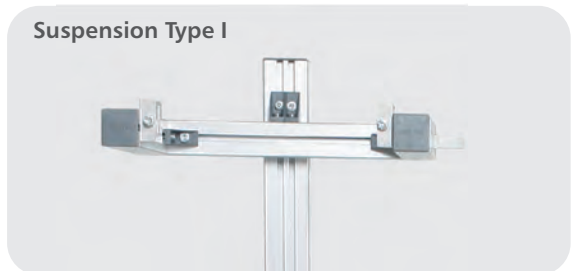

Important: Please indicate your X-ray unit type for the required customization of the unit suspension size.

CombiVet S Type I is fitted with our standard unit suspension. This suspension is not height-adjustable; the film-focus-distance is fixed.

CombiVet S Type III D is equipped with a height-

adjustable unit suspension module, operated via crank case. It is also possible to slide the X-ray unit backwards and forwards in axial direction.

In addition to height-adjustment and axial movement, a pivot joint integrated in the unit suspension of CombiVet S Type III D allows rotation of the X-ray unit for slanted beam direction.
