

→ Ensures comfortable and effortless working

Brief description

- X-ray generator can be positioned in all directions and angles
- Wide field of application (vertical, horizontal and slanted beam direction) with precise positioning of the X-ray generator via digital water level (programmable)
- Incorporated module for taking X-rays of standing animals (horizontal beam direction)
- Built in grid ready cassette drawer accepts all cassette sizes
- The cassette holder moves simultaneously with the X-ray unit along the table
- Optional: adjustable positioning aide for dysplasia coxae
- Dimensions of table top:
155.5 x 67.5 cm, working height: 73.0 cm
- Space requirement for MultiVet (required working space not considered)
 - Height: 210 to 230 cm (depending on X-ray generator and room height)
 - Length: 180 cm
 - Depth: 80 cm (135 cm with extension leaf folded out)

X-ray table „MultiVet“

X-ray table "MultiVet"

The MultiVet X-ray table is designed for under table and tabletop exposures. MultiVet facilitates an effortless and easy workflow. The X-ray generator can be positioned for vertical, horizontal and slanted beam direction. Using the integrated programmable, digital water level the X-ray generator may be positioned precisely.

The X-ray unit support pole moves along the table and is connected with the cassette drawer. The X-ray unit is always perfectly aligned with the X-ray cassette. Only minimum repositioning of the patient is required.

The cassette holder accepts all cassette sizes (up to 35 x 43 cm). The cassettes, regardless of size, are always lined up with the lateral centerline on the table top. The holder has a slide-in rail for the X-ray grid. Only one grid (size 35 x 43 cm) is required for all cassette sizes. The unit support features an innovative counterweight system for moving the X-ray unit effortlessly, quickly and smoothly to the required SID position. The X-ray unit can be adjusted to any angle and direction, so that exposures in slanted beam direction etc. are possible.

Exposures of standing patients can be taken with the help of an additional upright, retractable cassette holder (please specify cassette size) on the left table side (right side on request) and a fold-

up table leaf. The cassette holder is grid ready. MultiVet is made from anodised aluminium. The radiolucent white synthetic tabletop is easy to clean and disinfectant proof.

Table dimensions top:

155.5 x 67.5 cm

Working height: 73.0 cm

Space requirement:

(Required working space not considered)

Height: 210 to 230 cm (depending on X-ray generator and room height)

Length: 180 cm
